

Reg No:.....

**ALL KERALA COMMON MODEL EXAMINATION 2023 - 24**

**BIOLOGY (044)**

**SET-2**

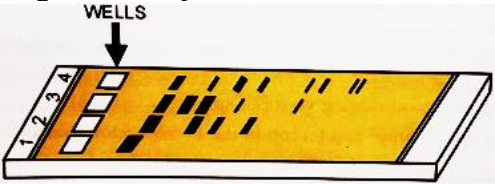

**Time Allowed :** 180 Minutes

**Maximum Marks :** 70

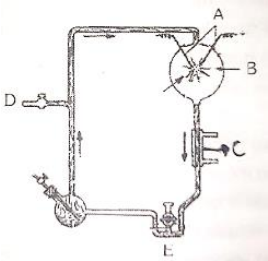

**General Instructions:**

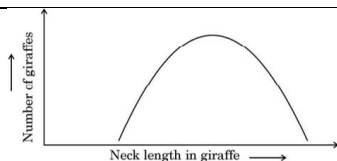

All questions are compulsory.

- a. The question paper has five sections and 33 questions. All questions are compulsory.
- b. Section–A has 16 questions of 1 mark each; Section–B has 5 questions of 2 marks each; Section– C has 7 questions of 3 marks each; Section– D has 2 case - based questions of 4 marks each; and Section–E has 3 questions of 5 marks each.
- c. There is no overall choice. However, internal choices have been provided in some questions. A student has to attempt only one of the alternatives in such questions.
- d. Wherever necessary, neat and properly labeled diagrams should be drawn.

<b>Section A (16x1=16)</b>		
1	Big holes in Swiss cheese are made by a: a) a machine b) a fungus that releases a lot of gases during its metabolic activities c) a bacterium producing a large amount of carbon dioxide d) a bacterium that produces methane gas	<b>[1]</b>
2	In gel Electrophoresis, DNA bands are separated on the basis of  a) Molecular size b) Molecular size and Molecular weight c) Charge d) Molecular weight	<b>[1]</b>

3	<p>Which one is not a side effect due to the regular use of contraceptive methods.</p> <p>a) Breast cancer</p> <p>b) AIDS</p> <p>c) Abdominal pain</p> <p>d) Nausea</p>	<b>[1]</b>
4	<p>The primary treatment of waste water involves the removal of:</p> <p>a) Dissolved impurities</p> <p>b) Stable particles</p> <p>c) Toxic substances</p> <p>d) Harmful bacteria</p>	<b>[1]</b>
5	<p>Vulnerable species are those species:</p> <p>a) Presently the population is sufficient but is undergoing depletion.</p> <p>b) Presently the population is sufficient and stable.</p> <p>c) Presently population is insufficient and undergoing depletion.</p> <p>d) Presently population is insufficient but undergoing addition.</p>	<b>[1]</b>
6	<p>Oral contraceptives for the female containing non - steroidal preparation with very few side effects and high contraceptive value, "once a week pill".</p> <p>a) Mala - D</p> <p>b) Loveregen</p> <p>c) Femilon</p> <p>d) Saheli</p>	<b>[1]</b>
7	<p>An MNC exploiting biological resources (turmeric) of other nation without proper authorization will be called as:</p> <p>a) Eugenics</p> <p>b) Bioethics</p> <p>c) Biopiracy</p> <p>d) Biopatent</p>	<b>[1]</b>

8	<p>One of the free - living anaerobic nitrogen - fixer is:</p> <p>a) Rhodospirillum</p> <p>b) Beijerinckia</p> <p>c) Azotobacter</p> <p>d) Rhizobium</p>	[1]
9	<p>Occasionally, a single gene may express more than one effect. The phenomenon is called:</p> <p>a) polygeny</p> <p>b) pleiotropy</p> <p>c) multiple allelism</p> <p>d) mosaicism</p>	[1]
10	<p>The diagram represents miller's experiment. Choose the correct combination of labelling.</p>  <p>a) A - electrodes, B - <math>\text{NH}_3 + \text{H}_2\text{O}</math>, C - hot water, D - tap, E - U trap</p> <p>b) A - electrodes, B - <math>\text{NH}_4 + \text{H}_2 + \text{CO}_2 + \text{CH}_3</math>, C - hotwater, D - vacuum, E - U trap</p> <p>c) A - electrodes, B - <math>\text{NH}_3 + \text{H}_2 + \text{H}_2\text{O} + \text{CH}_2</math>, C - cold water, D - vacuum, E - U trap</p> <p>d) A - electrodes, B - <math>\text{NH}_3 + \text{H}_2 + \text{H}_2\text{O} + \text{CH}_4</math>, C - steam, D - vacuum, E - U trap</p>	[1]
11	<p>The second trophic level in a lake is</p> <p>a) Phytoplankton</p> <p>b) Zooplankton</p> <p>c) Benthos</p> <p>d) Fishes</p>	[1]
12	<p>Select the option that gives the correct description of the process of Natural Selection with respect to the length of the neck of giraffe.</p>	[1]

- a) Stabilising selection as giraffes with medium neck lengths are selected.
- b) Directional selection as giraffes with longer neck lengths are selected.
- c) Stabilising selection as giraffes with longer neck lengths are selected further.
- d) Disruptive selection as giraffes with smaller and longer neck lengths are selected.

13 **Assertion:** There was no atmosphere on the early earth. **[1]**

**Reason:** Water vapour, methane, carbon dioxide, and ammonia released from molten mass covered the surface.

- a) Assertion and reason both are correct statements and reason is correct explanation for assertion.
- b) Assertion and reason both are correct statements but reason is not correct explanation for assertion.
- c) Assertion is correct statement but reason is wrong statement.
- d) Assertion is wrong statement but reason is correct statement.

14 **Assertion (A):** A wide range of contraceptive methods are available for family planning. **[1]**

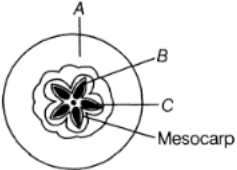

**Reason (R):** Natural method includes condoms, diaphragms, etc., while barrier methods use of an included method like periodic abstinence, lactational amenorrhea, etc.

- a) Both A and R are true and R is the correct explanation of A.
- b) Both A and R are true but R is not the correct explanation of A.
- c) A is true but R is false.
- d) A is false but R is true.

15 **Assertion (A):** Dough used for making food such as dosa and idli is fermented by bacteria. **[1]**

**Reason (R):** The puffed - up appearance of dough is due to the production of lactic acid.

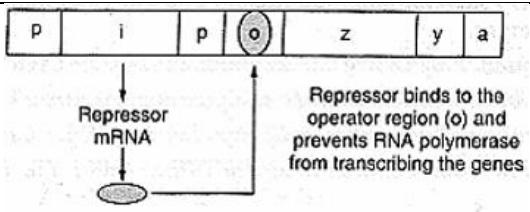

- a) Both A and R are true and R is the correct explanation of A.
- b) Both A and R are true but R is not the correct explanation of A.
- c) A is true but R is false.

	d) A is false but R is true.	
16	<p><b>Assertion (A):</b> An ecosystem can be visualized as a functional unit of nature.</p> <p><b>Reason (R):</b> Living organisms interact among themselves and also with the surrounding physical environment in the ecosystem.</p> <p>a) Both A and R are true and R is the correct explanation of A.</p> <p>b) Both A and R are true but R is not the correct explanation of A.</p> <p>c) A is true but R is false.</p> <p>d) A is false but R is true.</p>	[1]
<b>Section B (5x2=10)</b>		
17	<p>a. Why do organic farmers not recommend eradication of insect pests? Explain by giving reasons.</p> <p>b. How do ladybird beetles and dragonflies act as biocontrol agents?</p> <p style="text-align: center;"><b>OR</b></p> <p>What is LAB? What is its role in human stomach?</p>	[2]
18	<p>Write the functions of</p> <p>a.cry IAc gene</p> <p>b.RNA interference (RNAi)</p>	[2]
19	<p>Examine the diagram of mRNA given below. Mark the 5' and 3' ends of the mRNA by giving reason.</p> 	[2]
20	 <p>a.Given below is a TS of an apple. Identify A, B, and C.</p> <p>b.Why is an apple categorised as a false fruit?</p>	[2]
21	<p>In the diagram given below, show the path of a pollen tube from the pollen on the stigma into the embryo sac. Name the components of egg apparatus.</p>	[2]

**Section C (7x3=21)**

22 What are the various routes by which transmission of human immuno deficiency virus takes place? [3]

23  [3]

Look at the figure below depicting lac operon of E.coli.

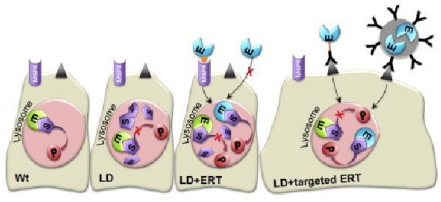

a.What could be the series of events when an inducer is present in the medium in which E.coli is growing?

b.Name the inducer.

24 Generally, it is observed that human males suffer from hemophilia more than human females, who rarely suffer from it. Explain giving reasons. [3]

25 Differentiate between intraspecific and inter specific competition. [3]

26 The image below elaborates enzyme - replacement therapy. [3]

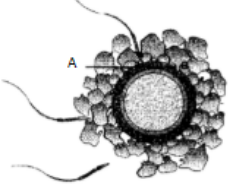

a.Explain enzyme - replacement therapy to treat adenosine deaminase deficiency.

b.Mention two disadvantages of this procedure.

27 Species diversity decreases as we move away from the equator towards the poles. What could be the possible reasons? [3]

**OR**

Define biosphere. What are the main sub - divisions of the biosphere?

28	Sweet potato tubers and potato tubers are the result of convergent evolution. Justify the statement.	[3]
<b>Section D (2x4=8)</b>		
29	<p><b>Read the text carefully and answer the questions:</b> Study the image below:</p>  <p>The diagram shows a cross-section of an ovum. A central nucleus is surrounded by a zona pellucida. A sperm is shown penetrating the zona pellucida at a point labeled 'a'. The sperm's head is inside the zona pellucida, and its tail is outside. The zona pellucida is depicted as a thick, multi-layered structure.</p> <ol style="list-style-type: none"> <li>Where exactly in the fallopian tube does this occur?</li> <li>One of the sperms is observed to penetrate 'a' of the ovum, as shown in the above diagram. Name 'a'.</li> <li>How is the sperm able to do so?</li> </ol> <p style="text-align: center;"><b>OR</b></p> <p>Explain the events thereafter upto morula stage.</p>	[4]
30	<p><b>Read the text carefully and answer the questions:</b> Malaria and dengue fever are major mosquito - borne public health problems in tropical countries. The authors report a malaria and dengue co - infection in an 11 - year - old boy who presented with sustained fever for 10 days. The physical examination revealed a flushed face, injected conjunctivae and left submandibular lymphadenopathy. His peripheral blood smear showed few ring - form trophozoites of Plasmodium falciparum. His blood tests were positive for dengue NS - 1 antigen and IgM antibody, and negative for IgG antibody. After the initiation of antimalarial treatment with artesunate and mefloquine, his clinical condition gradually improved. However, he still had low - grade fever that persisted for 6 days. Finally, he recovered well without fluid leakage, shock or severe bleeding.</p> <ol style="list-style-type: none"> <li>Name the fish that help in eradication of mosquito larvae.</li> <li>What is the reason of symptoms of malaria?</li> <li>Name the body parts and host in which following events takes place in life cycle of plasmodium. <ol style="list-style-type: none"> <li>asexual reproduction</li> <li>sexual reproduction.</li> </ol> </li> </ol> <p style="text-align: center;"><b>OR</b></p> <p>Name two vector borne diseases and their vector.</p>	[4]

<b>Section E (3x5=15)</b>		
31	<p>What are bioreactors? Draw labelled diagrams of the two types of bioreactors. What is their utility? Which is the common type of bioreactors?</p> <p style="text-align: center;"><b>OR</b></p> <p>a. Explain the different steps carried out in the Polymerase Chain Reaction, and the specific roles of the enzymes used.</p> <p>b. Mention application of PCR in the field of</p> <p style="padding-left: 40px;">i. Biotechnology</p> <p style="padding-left: 40px;">ii. Diagnostics</p>	<b>[5]</b>
32	<p>What are the advantages and disadvantages of cross - pollination?</p> <p style="text-align: center;"><b>OR</b></p> <p>a.Explain the role of stigma in pollen - pistil interactions.</p> <p>b. Describe the post - pollination events leading to double fertilization in angiosperms, starting with a two - celled pollen grain.</p>	<b>[5]</b>
33	<p>a. Name and describe the technique which is an important tool of forensic science.</p> <p>b. Mention any two applications of this technique other than its use in forensic studies.</p> <p style="text-align: center;"><b>OR</b></p> <p>a.List any four major goals of the Human Genome Project.</p> <p>b.Write any four ways the knowledge from HGP is of significance for humans.</p> <p>c.Expand BAC and mention its importance.</p>	<b>[5]</b>
