3 4	<p>Read the text carefully and answer the questions:</p> <p>In the countryside, rich peasant communities were active in the movement. Being producers of commercial crops, they were very hard hit by the trade depression and falling prices. As their cash income disappeared, they found it impossible to pay the government's revenue demand. And the refusal of the government to reduce the revenue demand led to widespread resentment. These rich peasants became enthusiastic supporters of the Movement, organising their communities, and at times forcing reluctant</p>	[4 1]

	<p>members, to participate in the boycott programmes. For them, the fight for swaraj was a struggle against high revenues. But they were deeply disappointed when the movement was called off in 1931 without the revenue rates being revised. So when the movement was restarted in 1932, many of them refused to participate. The poorer peasantry was not just interested in the lowering of the revenue demand. Many of them were small tenants cultivating land they had rented from landlords. As the Depression continued and cash incomes dwindled, the small tenants found it difficult to pay their rent. They wanted the unpaid rent to the landlord to be remitted. They joined a variety of radical movements, often led by Socialists and Communists. Congress was unwilling to support 'no rent' campaigns in most places. So, the relationship between the poor peasants and the Congress remained uncertain.</p> <ol style="list-style-type: none"> 1. Name the peasant communities that were active in the movement. 2. Why was Congress unwilling to support 'no rent' campaigns in most places? (It might upset the rich peasants and landlords.) 3. What did Swaraj meant for the rich peasants? 	
<p>3 5</p>	<p>Read the text carefully and answer the questions:</p> <p>Chhotanagpur plateau region has the maximum concentration of iron and steel industries. These include, low cost of iron ore, high grade raw materials in proximity, cheap labour and vast growth potential in the home market. Though, India is an important iron and steel producing country in the world yet, we are not able to perform to our full potential.</p> <ol style="list-style-type: none"> 1. In which region maximum iron and steel industries concentrated and why? 2. Why are we not able to perform to our full potential largely? 3. Where is Chota Nagpur Plateau located? 	<p>[4]</p>

3 6	<p>Read the text carefully and answer the questions:</p> <p>Over the forty years between 1973 - 74 and 2013 - 14, while production in all the three sectors has increased, it has increased the most in the tertiary sector. As a result, in the year 2013 - 14, the tertiary sector has emerged as the largest producing sector in India replacing the primary sector. Tertiary sector becoming so important in India. There could be several reasons. First, in any country several services such as hospitals, educational institutions, post and telegraph services, police stations, courts, village administrative offices, municipal corporations, defence, transport, banks, insurance companies, etc. are required. These can be considered as basic services. In a developing country the government has to take responsibility for the provision of these services. Second, the development of agriculture and industry leads to the development of services such as transport, trade, storage and the like. Greater the development of the primary and secondary sectors, more would be the demand for such services. Third, as income levels rise, certain sections of people start demanding many more services like eating out, tourism, shopping, private hospitals, private schools, professional training etc. Fourth, over the past decade or so, certain new services such as those based on information and communication technology have become important and essential. The production of these services has been rising rapidly.</p> <ol style="list-style-type: none"> 1. The tertiary sector becoming so important in India. Identify the reasons with regard to the given statement. 2. The given extract is throwing light on which of the main aspects of the economy? 	[4]
